EDUCATION

The College Of New Jersey

Sept. 2022 - Jan. 2026

B.S. Computer Science

GPA: 3.9/4.0 Dean's List: 2022 - 2026

TECHNICAL SKILLS

Languages: Java, Python, C++, JavaScript, TypeScript, HTML, CSS, SQL, MATLAB, R, sysML, Groovy, C#, C
Technologies & Tools: Git, GitHub, AWS, Docker, PostgreSQL, RESTful APIs, React, Node.js, Pandas, NumPy, MongoDB, OAuth 2.0, PyTorch, Express.js, Agile/Scrum, Jira, TensorFlow, LangChain, SageMaker, Jupyter Notebooks, Scikit-learn, VS Code, Flask, Jest, OpenCV, Tailwind CSS, Bootstrap

PROFESSIONAL EXPERIENCE

Prudential Financial - Data Science Intern

June - Aug. 2025

- Developed agentic AI workflows using LangGraph for forecasting business metrics and Prudential-specific data
- Integrated predictive models into company chatbot, enabling analytics for business analysts company-wide

Prudential Financial - Software Engineering Intern

June - Aug. 2024

- Developed an API role management library implementing OAuth 2.0 client-credentials flow, providing secure authentication middleware for downstream microservices
- Built a Backend-for-Frontend service optimizing data flow patterns and implementing secure vault secret management for enterprise applications
- Collaborated on standardized authentication templates for React applications, establishing consistent security protocols across development teams

ArmsVision - Data Scientist Contractor

May. 2025 - Current

- Developed chatbot for insureds, agents, and clients through RAG approach with vector search in MongoDB
- Developed an image risk analysis tool to speed up the underwriting process using fine-tuned VLMs, reducing time spent for underwriters

BAE Systems - SWE & Data Analytics Intern

May - Aug. 2023 and Dec. 2023 - Jan. 2024

- Engineered a real-time data pipeline using PyTorch and YOLO-v8 for automated vehicle classification
- Developed Java CAMEO plug-ins for automated model requirements documentation, optimizing systems engineering workflows for BAE teams
- Built an OCR document processing tool using BFS algorithms and transformers for PDF-to-CSV conversions

TCNJ - Researcher: Machine Learning & Computer Vision

Jan. 2023 - Current

- Research American Sign Language classification using machine learning and computer vision techniques
- Developed data preprocessing pipelines for ASL gesture normalization, supporting continuous data collection and model training workflows
- Evaluated classification algorithms and published research findings at ACM SIGCSE and ISVC

PROJECTS

Collaborative Bulletin Board

- Built a real-time, multi-user notes app with oauth authentication using Node.js, Express, React, and MongoDB.
- Developed an interactive bulletin board with real-time updates, file uploads, and user permissions.

Accessibility Operating System Control Application

- Developed an application enabling OS control via hand gestures and voice commands
- Utilized Python libraries, Google Cloud services, Convolutional Neural Networks, and LLMs to make the OS more accessible

AWARDS & ACTIVITIES

- Computer Science Freshman (2023), Sophomore (2024), Junior (2025) student award, TCNJ 2023, 2024
- DIGIT.all(Diversity and Inclusion Group In Teach for All) President, TCNJ Sept. 2022 - Current
- Upsilon Pi Epsilon Member (National Computer Science Honor Society) 2024 - Current
- Phi Kappa Phi Member (TCNJ Honor Society) 2024 - Current
